National and International restricted tender for elaboration of planning and development plan of urban mobility in Algiers province

According to articles 35, 45,46 the presidential decree N°15-247 of September 16, 2015 containing regulation of public deals and public service delegations, the Ministry of Public Works and Transportation launches national and international restricted tender for the preselecting of companies or business group of international spread , able to execute, great progress of transport infrastructures in Studies and accomplishment.

The objective is to retain, in two stages, the potential candidates to put in competition for the research for solution to stem the phenomena of congestion of road traffic in the capital.

The finality of this approach is to draw up an action plan and the launching, improving structuring projects, in a sustainable way, mobility in general and road traffic, in particular, in the province of Algiers, **while optimizing the functionally multimodal of the existents transport systems and their interoperability.**

In the first stage, the companies or business group eligible are those who have designed and carried out large-scale projects in the field of infrastructure development and urban transport, and who have the financial, professional and technical capacities essential to the execution of the project, which requires the intervention of experts in mobility and urban displacements, and a proven experience in the development of urban mobility projects.

The candidates participating in this first stage are invited to present their preliminary technical offers, without financial offers, in accordance with the terms of references (TDR) proposed.

These offers should address the following, among other things:

- ✓ Define and identify structuring projects that can mitigate congestion on the two main routes, namely the East Motorway and the South Bypass in the long term, taking into account forecasts of traffic trends on the latter.

- ✓ Identify public transport development schemes capable of reducing car dependence, especially in areas served mainly by road infrastructure, and improve accessibility conditions in order to establish a policy of multimodal transport and make public transport an attractive solution for inhabitant of Algiers, taking into account the geographical, socio-economic and environmental specificities of the capital.
- ✓ Address all the technical possibilities, without any restriction, that can be offered by large foreign companies or business group, according to their capacities, in the field of studies and construction of transport infrastructure. Whether it is multi-storey motorways, the restructuring of complex interchanges, the construction of monorails, urban trains or cable cars or other modes of transport.

The companies or business group are interested in this opinion are invited to provide a file consisting the following administrative and technical documents:

1. Documents proving their legal existence (tax registration, certificate and/or with the Trade Register);
2. Financial references (turnover, annual results, etc.);
3. Relevant references for similar actions during the last 10 years;
4. A report of the scenarios and project variants proposed, with a description of the techniques and procedures for implementation and their management and operating system;
5. A proposal for a working methodology with a short and medium-term action plan including the different stages of study and realization of the planned infrastructures;
6. Proposals for financing options and/or co-financing of the project.

In the second stage, pre-selected companies or business group will be invited to submit their tenders on the basis of a specification defining the contractual clauses in accordance with the regulations governing public procurement.

Companies interclassified by this notice are invited to withdraw the Reference terms at the directorate of general administration in head office of the Ministry of Public Works and Transport at 6 Rue Mustapha Khalef ,Benknoun ,Alger, from the day of the publication of this notice in national news papers and on the Official Website www.mtpt.gov.dz.

The proposals must be forwarded to the same address, at the latest 31 May 2020.
